scandinavian sense

## Creative new products with a cosy feel

Using new solutions with traditional forms, this year's new products join quality with design and sustainability with innovation. We call it Scandinavian sense.

Flexible meeting spaces breed creativity. Cosiness makes me-time more beneficial. With new combinations and innovative solutions, we continue to create meeting spaces that can be adapted to your immediate needs. Thoughtful solutions where function and character go hand in hand. And where tranquil harmony inspires.

**Bolero**

*by Nina Jobs*

Comfort and fashion meet when the new Bolero sofa series occupies the room. Timeless yet a step ahead. With its soft shape and different layers, Bolero combines a unique expression with a feeling of coming home. No matter where you put it.

**Twig**

*by Johannes Lindner*

With a softly curved seat and a backrest topped with the dowel that gave the chair its name, the Twig chair fits into any environment that requires flexible solutions. Natural design and practical function – Twig is a minimalistic chair that both blends in and stands out. And when function and innovation meet, your bag gets its own place to hang out.

## News 2020

### Spino

*by Stefan Borselius*

A new straight piece now makes it even easier to endlessly rearrange and expand this winding spine of seating sections. With or without backrests. Monochrome or colourful. And now also straight or curvy. With the Spino modular sofa, the sky's the limit – that is, until you run out of space!

### Soft Top

*by Brad Ascalon*

The Soft Top family started with four chairs but now has some new companions. With two new bar stools and three new benches – where a tabletop joins together one of the benches – Soft Top makes taking a break a little easier. And a little more comfortable.

# Sustainability

## Sustainability

Skandiform defines sustainability as a way of working that values a holistic approach comprising environmental, quality, and work environment aspects. With this mind-set, we develop timeless furniture designs, always keeping comfort and life cycle in focus.

## Design

We ensure that the furniture we produce is well thought through, sustainable by having as little an impact on the environment as possible, can be recycled and gives a high level of comfort and wellbeing. We take care to select materials and suppliers that can meet our high standards. Our products are made to stand the test of time from both a quality and design perspective.

## Social responsibility

We strive to maintain good working relationships throughout our entire value chain in order to create a safe and progressive work environment that minimises injuries and ill health. We conduct risk assessments of our suppliers and enter Code of Conduct agreements. Internally we operate within the framework of work environment certification in accordance with ISO 45001.

## Certifications

In support of our sustainability work, Skandiform AB maintains a certified operating system with processes and procedures that comply with ISO 9001, ISO 14001 and ISO 45001. To ensure the origins of our wood supplies, we are also certified in accordance with the FSC Chain of Custody. Sustainability requirements are addressed in dialogue with our customers and other interested parties and through the environmental and sustainability labelling with which we mark our products, such as Möbelfakta.

## Agenda 2030

The UN's Agenda 2030 is a collection of global sustainability goals. It's an obvious step for Skandiform to engage in and contribute to this. We are contributing to several of the Agenda's goals through our sustainability efforts.
