AUTUMN NEWS 2026**

2026-08-31

FLEXIBILITY IN FULL BLOOM

At the heart of the Skandiform autumn 2026 collection is Plantéa, a flexible modular system that combines greenery, furniture, acoustic solutions, and space-defining elements to create dynamic environments. Designed for the spaces in between, it adapts to changing needs and encourages new ways to meet, work, and connect while bringing nature closer to people. Complementing Plantéa, Allé Mini desk and screen add greenery to workstations in a compact format. In addition, Fendo bar stool supports movement and informal interaction, while Tinnef laptop provides a smart surface for different settings. Together, they create inspiring spaces that reach new heights while enhancing well-being, variation, and creativity.
